

## A ‘Constitutional Prescription’ to Save the Nation and Its Healthcare System

*Tom A. Coburn, M.D.*

*Retired U.S. Senator and Senior Advisor to Convention of States*

**“Did you ever think it would get this bad? The federal government now practices medicine, tells you how you have to record your notes, and limits your ability to freely practice as you were trained.”**

Do you realize there is nothing in the ‘original’ Constitution that gives them such power? Not only that, but half the time we have our staff asking ‘mother may I’ from some nurse employed by an insurance company, looking at a flow chart then telling you what you can and cannot do — without knowing

or ever seeing the patient. There is a way to fix ‘medicine’ by limiting the federal government’s control over the market. Article V of the Constitution allows us to call an Amendments Convention to limit federal intrusion. It is the instrument our Founders gave us to push back when the

federal government dishonors its enumerated and limited powers. Go to the website below and see what you can do to start regaining control of your practice. Free yourself from becoming a ‘puppet’ for insurance companies and federal bureaucrats who are taking away your ability to enjoy your work and help people.

*see back for more*

**“Patients deserve a physician who can advocate for their health without having to wrangle with bureaucrats and red tape.”**

# Physicians for COS: The Diagnosis Is Clear

*Jeffrey I. Barke, M.D.*

*Concierge Primary Care Physician - Newport Beach, CA  
Physicians for COS National Coordinator*

**“Physicians should be the strongest supporters of this brilliantly-crafted safeguard of federalism placed in the Constitution by our Founders.”**

No profession has been hurt more by the heavy hand of the federal government than physicians. From mandates to regulations, from poor reimbursement to licensing dictates, the federal government interferes with the practice and art of medicine. Beyond just advocating for legislative relief, there is

another solution that is as big as the problem. Physicians for Convention of States (COS) is the only solution to reduce the power and scope of the federal government, returning regulatory power to the states and the practice of medicine to physicians. I urge my fellow American physicians to join with me

in supporting an Article V Convention of States to take back control of the practice of medicine. It's the only way that we can return the practice of medicine back to the intimate relationship between a doctor and patient without interference by the heavy hand of a distant federal government.

**“The practice of medicine is controlled, taxed, and regulated to the point of being destroyed by the heavy hand of the federal government.”**
