

# Project 2025

PRESIDENTIAL TRANSITION PROJECT

---

It is not enough for conservatives to win elections. If we are going to rescue the country from the grip of the radical Left, it's essential that the next conservative administration has the policy resources and people in place on day one, ready to carry out bold conservative solutions to save our country.

The 2025 Presidential Transition Project was started by a broad coalition of organizations across the conservative movement in 2022 to assist the next conservative president. We started this project before any major candidate announced a campaign—and Project 2025 has never spoken for any candidate, despite lies from the Left and the media.

Project 2025 is intended to be a resource to the next president in four key ways:

## Policy Agenda

The *Mandate for Leadership* is a comprehensive guide of policy recommendations. The book pulls from the expertise of hundreds of political appointees, policy scholars, and conservative leaders across the conservative movement. It offers both specific proposals for addressing every major issue facing the country and a blueprint for how to restructure each federal agency to solve those issues. The first edition of *Mandate for Leadership* was released in 1981, following the election of Ronald Reagan, to serve as policy guide for the incoming Reagan administration, and has been published for over 40 years. **Read the Policy Agenda: [project2025.org/policy](https://project2025.org/policy)**

## Presidential Personnel Database

The most comprehensive policy agenda will have only limited impact without the right people in place to implement it. The personnel database collects the resumes of individuals that would like to serve in a presidential administration. **Submit your resume today to be included in the personnel database: [project2025.org/personnel](https://project2025.org/personnel)**

## Presidential Administration Academy

This fully online program is designed to prepare and equip future political appointees now to be ready on day one of the next conservative administration. These on-demand courses cover topics ranging from how to identify appointee positions for which you qualify to navigating the necessary background and security clearance processes. Learn the intricacies of the federal budget process, how to work with the media, managing congressional and stakeholder relations, the federal procurement process, and dozens of other topics. **Apply to enroll now: [project2025.org/training](https://project2025.org/training)**

## Playbook

The project will create a playbook of actions for the first 180 days of the new administration to bring quick relief to Americans suffering from the Left's devastating policies.

# Project 2025 Policy Recommendations

---

## Secure the Border

Project 2025's policy reforms would end America's decades-long border crisis by:

- Thoroughly enforcing existing immigration laws.
- Aggressively constructing a wall on our southern border.
- Efficiently identifying and rejecting fraudulent asylum claims.
- Restoring the "remain in Mexico" policy for people awaiting asylum claims.
- Arresting, detaining, and removing of immigration violators anywhere in the United States.

## Unleash American Energy

Project 2025's policy reforms would secure abundant access to energy for the American people by:

- Ensuring access to abundant, reliable, and affordable energy.
- Removing efforts to push sustainable-development schemes connected to food production.
- Stopping collaboration with and funding of progressive foundations, corporations, international institutions, and NGOs that advocate for climate fanaticism.
- Ending the Biden administration's war on fossil fuels in the developing world and supporting the responsible management of oil and gas reserves as the quickest way to end wrenching poverty and the need for open-ended foreign aid.
- Ensuring that the Nuclear Regulatory Commission facilitates rather than hampers private-sector nuclear energy innovation and deployment

## De-Weaponize the Federal Government and Dismantle the Deep State

Project 2025's policy reforms would restore self-governance to the American people by:

- Firing supposedly "un-fireable" federal bureaucrats.
- Closing wasteful and corrupt bureaus and offices.
- Eliminating woke propaganda at every level of government.
- Restoring the American people's Constitutional authority over the administrative state.
- Returning governing power to the Congress and President instead of unelected bureaucrats.

## Improve Education

Project 2025's policy reforms would strengthen our education system by:

- Expanding school choice, so all children have the option of a great education, regardless of zip code.
- Promoting parents' rights in public education so American schools serve parents, not the other way around.
- Removing critical race theory and gender ideology curricula in every public school in the country.
- Returning education control to state and local governments.
- Shifting some functions of the Department to other departments including Labor, Justice, and Commerce.
